Quarto

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see <https://quarto.org>.

Running Code

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
1 + 1
```

```
[1] 2
```

You can add options to executable code like this

```
[1] 4
```

The `echo: false` option disables the printing of code (only output is displayed).

*Replication files are available on the author’s Github account (<http://github.com/svmiller/svm-r-markdown-templates>). **Current version:** June 01, 2026; **Corresponding author:** steven.v.miller@gmail.com.
